TOP 50 MOST REPEATED BIOLOGY MCQS

Expert Curated Board Revision Series

By Pragya Thunderstudy

Reproduction (Animal & Plant)

1. Colostrum is rich in:
A. IgG B. IgE C. IgA D. IgM
Ans: IgA

2. Hormone for ovulation:
A. FSH B. LH C. Estrogen D. Progesterone
Ans: LH

3. Fertilisation site:
A. Uterus B. Ovary C. Fallopian tube D. Cervix
Ans: Fallopian tube

4. Embryo nutrition:
A. Amnion B. Placenta C. Chorion D. Umbilical cord
Ans: Placenta

5. Acrosome function:
A. Motility B. Penetration of ovum C. Respiration D. Protection
Ans: Penetration of ovum

6. Double fertilisation:
A. Gymno B. Angio C. Pterido D. Bryo
Ans: Angiosperms

7. PEN ploidy:
A. 2n B. n C. 3n D. 4n
Ans: 3n (Triploid)

8. Water pollination:
A. Zostera B. Mango C. Rose D. Pea
Ans: Zostera

9. Outbreeding device:
A. Cross B. Self pollination C. Fert D. Germ
Ans: Self pollination

10. Synergids help:
A. Fert B. Pollen tube guidance C. Nutrition D. Seed
Ans: Pollen tube guidance

Genetics & Evolution

11. ABO Blood group:
A. Dominance B. Codominance C. Recessive D. Mutation
Ans: Codominance

12. Down Syndrome:
A. Trisomy 21 B. Trisomy 18 C. XO D. Deletion
Ans: Trisomy 21

13. Genes on same Chromosome:
A. Assortment B. Linkage C. Mutation D. Crossover
Ans: Linkage

14. Histone core:
A. Tetramer B. Octamer C. Hexamer D. Dimer
Ans: Octamer

15. Sickle cell cause:
A. Replication B. Translation C. Transcription D. Gene mutation
Ans: Gene mutation

39. Convergent Evolution:
A. Homologous B. Analogous C. Vestigial D. None
Ans: Analogous organs

40. Industrial Melanism:
A. Finches B. Peppered moth C. Horses D. Giraffe
Ans: Peppered moth

48. Crossing over stage:
A. Prophase I B. Meta C. Ana D. Telo
Ans: Prophase I

Molecular Basis & Central Dogma

16. RNA Poly uses:
A. dATP B. rNTP C. Amino acids D. tRNA
Ans: rNTP

17. Joins Okazaki:
A. DNA Poly B. Ligase C. Helicase D. Primase
Ans: DNA ligase

18. Lagging strand:
A. Continuous B. Discontinuous C. Bidir D. None
Ans: Discontinuous

19. Stop Codon:
A. AUG B. UAA C. UGG D. UAC
Ans: UAA

20. Genetic Material Proof:
A. Mendel B. Hershey & Chase C. Watson D. Darwin
Ans: Hershey & Chase

49. Central Dogma:
A. DNA-RNA-Protein B. RNA-DNA-Prot C. Prot-DNA D. DNA-Prot
Ans: DNA → RNA → Protein

50. Lac Operon Sugar:
A. Glucose B. Lactose C. Starch D. Protein
Ans: Lactose

Biotech & Microbes

21. Restriction source:
A. Plants B. Bacteria C. Animals D. Fungi
Ans: Bacteria

22. EcoRI type:
A. Ligase B. Res enzyme C. Poly D. Heli
Ans: Restriction enzyme

23. Common host:
A. Virus B. E. coli C. Yeast D. Plant
Ans: E. coli

24. PCR Enzyme:
A. Taq Poly B. Ligase C. Primase D. Heli
Ans: Taq polymerase

25. DNA Vector:
A. Ribo B. Plasmid C. Lyso D. Golgi
Ans: Plasmid

36. Biogas agent:
A. Methano B. Rhizo C. Lacto D. Yeast
Ans: Methanobacterium

37. Penicillin source:
A. Penicillium B. Yeast C. Bact D. Virus
Ans: Penicillium

38. STP Flocs:
A. Fungi only B. Bact+Fungi C. Proto D. Algae
Ans: Bacteria + fungal filaments

45. Totipotency:
A. Division B. Ability to form plant C. Mut D. Fert
Ans: Ability to form whole plant

47. EtBr usage:
A. PCR B. Gel Electrophoresis C. Clone D. Mut
Ans: Gel electrophoresis

Health & Disease

26. AIDS path:
A. Bact B. Virus C. Fungus D. Proto
Ans: Virus (HIV)

27. Interferon:
A. RBC B. Virus inf cells C. Platelets D. Neurons
Ans: Virus infected cells

28. Malaria path:

A. Plasmodium B. Tryp C. Enta D. Virus

Ans: Plasmodium

29. Antibiotics vs:

A. Bact B. Virus C. Fungi D. Proto

Ans: Ineffective vs Virus

30. Vaccine type:

A. Pass B. Active C. Nat D. Art

Ans: Active immunity

46. Amniocentesis:

A. Gen disorders B. BP C. Hormones D. Immunity

Ans: Genetic disorders

Ecology & Physiology

31. Energy Pyramid:

A. Inv B. Upright C. Both D. Irr

Ans: Always Upright

32. BOD measures:

A. O2 B. Org pollution C. Nitro D. Temp

Ans: Organic pollution

33. Mutualism:

A. Both win B. One wins C. Both lose D. One lose

Ans: Both species benefit

34. Ozone depletion:

A. CO2 B. CFCs C. Meth D. Nitro

Ans: CFCs

35. Deforestation:

A. Rain B. Soil Erosion C. -Pollu D. +Bio

Ans: Soil erosion

41. Water transport:

A. Phlo B. Xylem C. Camb D. Cor

Ans: Xylem

42. Stomata open:

A. Turgidity B. Loss C. Horm D. Osm

Ans: Guard cell turgidity

43. Parturition:

A. Oxy-tocin B. Insulin C. Thyr D. ADH

Ans: Oxytocin

44. FSH stimulates:

A. Ovula B. Follicle growth C. Fert D. Impl

Ans: Follicle growth
