

MOCK TEST – ENVIRONMENT AND SUSTAINABLE DEVELOPMENT

Class 12 – Chapter 5 (NCERT – Indian Economic Development)

Time	1 hour 30 minutes
Maximum Marks	80
Sections	A (MCQs), B (Very-Short Answers), C (Short Answers), D (Long Answers)
Calculators	Not allowed (data tables provided where required)
Rough work	Use the last page of the answer-sheet.

SECTION A – MULTIPLE CHOICE QUESTIONS (30 × 1 = 30 MARKS)

Choose the correct option (A, B, C or D).

1. Which of the following is NOT a component of the environment?

- (A) Atmosphere
- (B) Hydrosphere
- (C) Lithosphere
- (D) Information technology

2. The “Ecosystem” consists of:

- (A) Only plants and animals
- (B) Living organisms and their physical surroundings interacting as a unit
- (C) Only the abiotic factors like water, soil and sunlight
- (D) Human beings only

3. The “Greenhouse effect” is primarily caused by:

- (A) Oxygen
- (B) Carbon dioxide and other gases trapping heat in the atmosphere
- (C) Ozone depletion
- (D) Deforestation

4. Which of the following is a renewable source of energy?

- (A) Coal
- (B) Petroleum
- (C) Solar energy
- (D) Natural gas

5. The “Kyoto Protocol” is an international treaty that aims at:

- (A) Reducing deforestation
- (B) Controlling greenhouse gas emissions
- (C) Promoting nuclear energy
- (D) Banning plastic use

6. The “Carbon credit” concept is related to:

- (A) Trading of permits that allow a certain level of carbon emissions
- (B) Providing loans for renewable energy projects
- (C) Taxing carbon-based fuels
- (D) Subsidising electric vehicles

7. The “National Action Plan on Climate Change (NAPCC)” was launched in:

- (A) 2005
- (B) 2008
- (C) 2010
- (D) 2015

8. Which of the following is a direct effect of air pollution on human health?

- (A) Osteoporosis
- (B) Respiratory diseases such as asthma and bronchitis
- (C) Diabetes
- (D) Malaria

9. The “Biodiversity hotspot” concept was popularized by:

- (A) Norman Borlaug
- (B) Edward O. Wilson
- (C) Rudolf Carson
- (D) Mahatma Gandhi

10. Which Indian legislation deals with the “Protection of Air Pollution”?

- (A) Water (Prevention & Control of Pollution) Act, 1974
- (B) Air (Prevention & Control of Pollution) Act, 1981
- (C) Environment (Protection) Act, 1986
- (D) Forest (Conservation) Act, 1980

11. The “Environmental Impact Assessment (EIA)” is a process used:

- (A) After a project is completed to assess damage
- (B) Before a project is approved to evaluate its likely environmental effects
- (C) To calculate the economic profit of a project
- (D) To determine the tax liability of a firm

12. Which of the following is NOT a cause of water pollution in India?

- (A) Industrial effluents
- (B) Agricultural runoff (fertilisers and pesticides)
- (C) Vermicomposting
- (D) Untreated sewage

13. The “Green GDP” is a measure that:

- (A) Adds the value of environmental degradation to the traditional GDP
- (B) Excludes all services from GDP calculation
- (C) Measures only the value of forest produce
- (D) Is used to calculate the national income of agricultural economies

14. The “National Green Tribunal (NGT)” was established in:

- (A) 2005
- (B) 2010
- (C) 2015
- (D) 2020

15. Which of the following is an example of a “sustainable development” practice?

- (A) Over-extraction of groundwater for irrigation
- (B) Using renewable energy sources like wind and solar power
- (C) Converting forest land into agricultural fields
- (D) Dumping industrial waste into rivers

16. The “Agenda 21” is a global plan related to:

- (A) Trade liberalisation
- (B) Sustainable development and environmental protection
- (C) Military cooperation
- (D) Financial inclusion

17. The “COP” in climate-change negotiations stands for:

- (A) Conference of the Parties
- (B) Committee on Pollution
- (C) Council of Presidents
- (D) Committee on Planning

18. Which of the following is a major source of indoor air pollution in rural India?

- (A) Use of liquefied petroleum gas (LPG)
- (B) Burning of biomass (wood, cow-dung) for cooking
- (C) Industrial emissions
- (D) Vehicular exhaust

19. The “Swachh Bharat Mission (Gramin)” primarily aims at:

- (A) Providing electricity to all villages
- (B) Achieving universal sanitation coverage (toilet construction)
- (C) Building highways
- (D) Promoting organic farming

20. Which of the following is NOT a function of the “Central Pollution Control Board (CPCB)”?

- (A) Monitoring air-quality standards
- (B) Enforcing vehicular emission standards
- (C) Managing wildlife sanctuaries
- (D) Advising the government on environmental policies

21. The “Montreal Protocol” is an international agreement aimed at protecting:

- (A) The ozone layer
- (B) Tropical rainforests
- (C) Marine ecosystems
- (D) Wetlands

22. The “Carbon sink” concept refers to:

- (A) A place where carbon is released into the atmosphere
- (B) A reservoir (e.g., forests, oceans) that absorbs carbon dioxide
- (C) A tax levied on carbon emissions
- (D) A method of carbon capture in industries

23. Which Indian state has the largest area under forest cover?

- (A) Madhya Pradesh
- (B) Arunachal Pradesh
- (C) Maharashtra
- (D) Uttar Pradesh

24. The “Sustainable Development Goals (SDGs)” were adopted by United Nations in:

- (A) 2000
- (B) 2012
- (C) 2015
- (D) 2018

25. The “Polluter Pays Principle” suggests that:

- (A) Pollution should be ignored for economic growth
- (B) Those who cause pollution should bear the cost of preventing or controlling it
- (C) The government should subsidise all polluting industries
- (D) Consumers must pay for all environmental damage

26. Which of the following is a “non-renewable” source of energy?

- (A) Solar energy
- (B) Wind energy
- (C) Coal
- (D) Biomass

27. The “National Ambient Air Quality Standards (NAAQS)” in India are prescribed by:

- (A) Ministry of Health and Family Welfare
- (B) Ministry of Environment, Forest and Climate Change (MoEF&CC)
- (C) Central Pollution Control Board (CPCB)
- (D) State Governments only

28. Which of the following is an example of an “eco-friendly” practice?

- (A) Using plastic bags for shopping
- (B) Recycling of paper and plastic
- (C) Burning of leaves for disposal
- (D) Dumping of hazardous waste in landfill without treatment

29. The “India State of Forest Report (ISFR)” is published by:

- (A) Ministry of Agriculture
- (B) Forest Survey of India (FSI)
- (C) National Remote Sensing Centre (NRSC)
- (D) World Bank

30. The “Climate Change Performance Index (CCPI)” evaluates countries on:

- (A) Military strength
- (B) Greenhouse gas emissions, renewable energy, and climate policy
- (C) Economic growth only
- (D) Trade balance

SECTION B – VERY SHORT ANSWER QUESTIONS (10 × 2 = 20 MARKS)

Answer each question in 2–3 sentences.

31. Mention any two main components of the environment.
32. Define “sustainable development”.
33. Name any two renewable sources of energy.
34. What is the “Polluter Pays Principle”?
35. Mention one Indian legislation enacted to control water pollution.
36. State two objectives of the “National Action Plan on Climate Change (NAPCC)”.
37. What is meant by “environmental impact assessment (EIA)”?
38. Name any two air-polluting gases.
39. Give one reason why forests are considered a “carbon sink”.
40. Mention one function of the “National Green Tribunal (NGT)”.

SECTION C – SHORT ANSWER QUESTIONS (5 × 4 = 20 MARKS)

Answer each question in about 80-100 words.

41. Discuss the causes and consequences of air pollution in Indian cities.
42. Explain the concept of “sustainable development” and list three measures to achieve it in India.
43. Analyse the role of “renewable energy” in reducing India’s carbon emissions.
44. Examine the major provisions of the “Environment (Protection) Act, 1986”.
45. Evaluate the effectiveness of the “Swachh Bharat Mission (Gramin)” in improving rural sanitation and environmental health.

SECTION D – LONG ANSWER QUESTIONS (2 × 5 = 10 MARKS)

Answer each question in about 150-200 words.

46. “Economic growth in India has often come at the cost of environmental degradation.” Critically examine this statement and suggest measures to balance growth with environmental sustainability.

47. Discuss the challenges faced by India in implementing the “National Action Plan on Climate Change (NAPCC)” and suggest policy reforms to achieve its goals.

ANSWER KEY & EXPLANATIONS

Q.No.	Answer	Explanation
1	D	Information technology is not a natural component of the environment.
2	B	Ecosystem interacts between biotic and abiotic factors.
3	B	CO ₂ and other GHGs trap infrared radiation.
4	C	Solar energy is naturally replenished.
5	B	Targets reduction of Greenhouse Gas emissions.
6	A	Tradable permits for carbon emissions.
7	B	NAPCC was released by the PM's Council in 2008.
8	B	Direct impact on respiratory system.
9	B	Wilson is a pioneer in biodiversity studies.
10	B	Focuses specifically on air quality regulation.
11	B	Predictive tool for sustainable planning.
12	C	Organic process, helps environment rather than polluting.
13	A	Adjusts GDP for depletion of natural resources.
14	B	Statutory body for environmental litigation.
15	B	Promotes energy use without depleting non-renewables.
16	B	Non-binding action plan from 1992 Earth Summit.
17	A	The supreme body of the climate convention.
18	B	Traditional fuels release thick smoke indoors.
19	B	Primary goal is ODF (Open Defecation Free) status.
20	C	Wildlife is usually handled by MoEF&CC/Wildlife boards.
21	A	Phasing out CFCs and HCFCs.
22	B	Absorbs more carbon than it releases.
23	A	Consistent leader in total forest area.
24	C	Replaced the Millennium Development Goals.
25	B	Internalises the external cost of pollution.

Q.No.	Answer	Explanation
26	C	Fossil fuel with limited reserves.
27	B	MoEF&CC notifies these based on CPCB data.
28	B	Resource conservation via circular economy.
29	B	Organisation based in Dehradun under MoEF&CC.
30	B	Independent monitoring tool by environmental NGOs.
