

MOCK TEST: TEST AND MEASUREMENT IN SPORTS

Physical Education Class 12 | Chapter 6

MARKS: 50

TIME: 1 HOUR

SESSION: 2025-26

SECTION A: Very Short Answer (1m)

- 1 **Q1.** What is the primary purpose of test and measurement in sports?
- 1 **Q2.** Name one test used to measure cardiovascular endurance.
- 1 **Q3.** Define "somatotype" in the context of physical fitness assessment.
- 1 **Q4.** List one component of physical fitness that can be measured using the push-up test.
- 1 **Q5.** What is the significance of BMI in sports evaluation?

SECTION B: Short Answer (3m)

- 3 **Q6.** Explain the importance of reliability and validity in sports testing. Provide one example of each.
- 3 **Q7.** Discuss the procedure for conducting the Harvard Step Test. Mention purpose and one limitation.
- 3 **Q8.** Describe how anthropometric measurements are used in sports. Mention one tool.

3 **Q9.** How does the 50m dash test assess speed? Outline the steps for administration.

3 **Q10.** Outline the key principles of test administration in physical education.

SECTION C: Long Answer (5m)

5 **Q11.** Elaborate on various types of tests (fitness, skill, knowledge). Discuss applications and limitations.

5 **Q12.** Analyze the role of technology (wearables, biomechanics software) in modern performance assessment.

5 **Q13.** Explain the process of interpreting test results for athletes. Discuss factors and improvement strategies.

SOLUTIONS / ANSWER KEY

A1: To assess fitness/skills to guide training and performance tracking.

A2: Harvard Step Test or Rockport Walking Test.

A3: Classification of body types (Ectomorph, Mesomorph, Endomorph).

A4: Upper body muscular strength and endurance.

A5: Indicates body composition/mass relative to height to identify health risks.

A6: Reliability = Consistency; Validity = Accuracy of target measurement.

A7: 5-min stepping on 50cm bench at 30bpm; measures CV fitness. Limitation: Age/Health constraints.

A8: Gauges body dimensions. Tool: Skinfold Calipers for fat % assessment.

A11-13 Summary: Modern tests integrate standard fitness metrics with skill analytics. Technology like GPS and heart-rate monitors provide real-time data for personalized IEPs. Interpretation must account for gender, age, and individual baseline.
