QUESTION 12

5 MARKS

Analyze factors like anxiety, aggression, and concentration. Provide management strategies.

QUESTION 13

5 MARKS

Explain team dynamics and leadership styles (Autocratic, Democratic, Laissez-faire).

ANSWER KEY / REVISION GUIDE

A1: Motivation drives athletes to set goals and persist through challenges.

A2: Intrinsic Motivation or Task-oriented motivation.

A3: A state of worry/nervousness that impairs focus during competition.

A4: Frustration due to poor performance or perceived unfair play.

A5: Boosts resilience and the ability to handle pressure during high-stakes moments.

B6-10 Summary: Intrinsic motivation is the internal joy of playing. Team selection relies on traits like extraversion for cohesion. Group cohesion improves communication. Stress management involves identification, coping (visualization), and recovery.

C11-13 Deep Dive: Leadership styles impact morale: Autocratic (fast decisions), Democratic (collaborative), and Laissez-faire (expert freedom). Strategies for aggression include anger management, while concentration is improved via mindfulness and yoga.
