

# Children & Women in Sports: A Visual Guide for Class 12 Physical Education

## WHO Exercise Guidelines for Lifelong Health

### Spinal Deformities

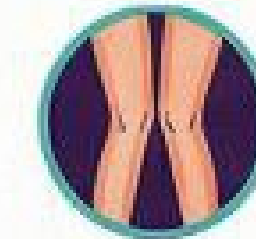

## Identifying & Correcting Postural Deformities

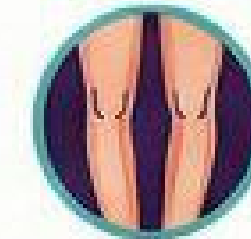

### What is Posture?

The alignment of the body's limbs while standing, sitting, walking, or lying down. Good posture minimizes fatigue, while bad posture can lead to deformities.

### Limb Deformities

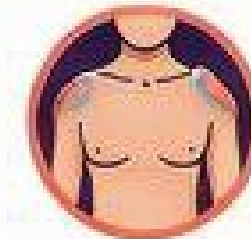

**Knock Knees (Genu Valgum)**  
Correction: Horse riding, Padmasana (Lotus Pose), pillow between knees

**Bow Legs (Genu Varum)**  
Correction: Walking on toes, Garudasana (Eagle Pose), diet (Vit D, Calcium, Phosphorus)

### Other Deformities

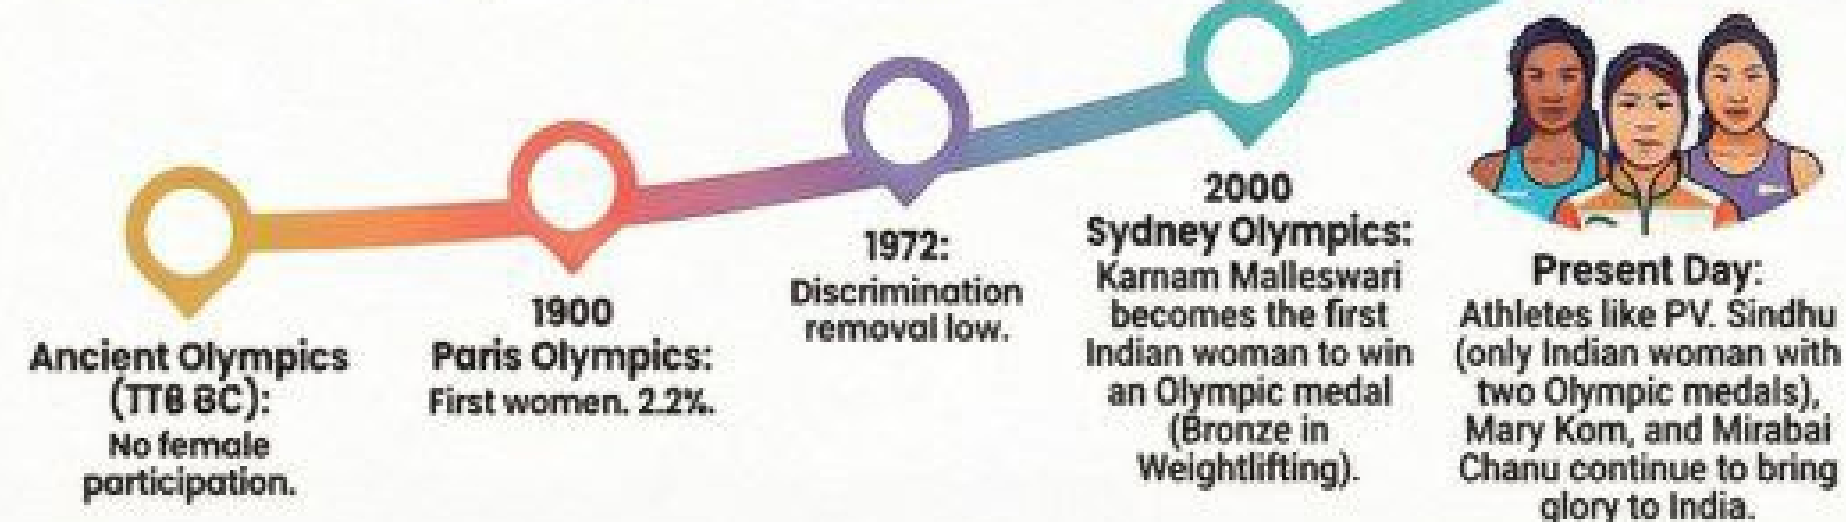

**Round Shoulders**  
Correction: Chest stretches, pull-ups, Dhanurasana, Chakrasana

**Flat Foot (Fallen Arches)**  
Correction: Walking on heels/toes, rope skipping, jumping, heel raises

## Women in Sports: Participation & Special Considerations

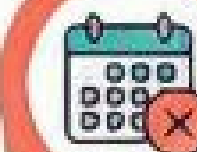

### A Timeline of Participation

### Barriers to Participation in India

Made By Dr Pragya  
@ThunderStudy

**2. Amenorrhea**  
Absence of menstrual periods for 3+ months; caused by excessive exercise & inadequate calorie intake, hormonal imbalance.

### The Female Athlete Triad

A critical syndrome of three interconnected health disorders.

**1. Osteoporosis**  
Weak/brittle bones due to low bone density, low estrogen, calcium/Vit D deficiency.

**3. Eating Disorders**  
A mental illness characterized by abnormal eating habits that negatively impact health.
