

# YOGA ASANAS FOR LIFESTYLE DISEASES

## Class 12 Physical Education Study Guide

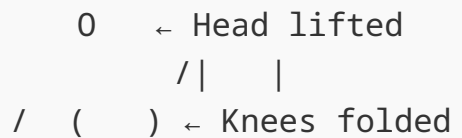

### ASANAS FOR OBESITY & DIABETES

#### 1. Pavanmuktasana (Wind-Relieving Pose)

##### Definition / Meaning

"Pavan" means wind and "Mukta" means release. This asana helps release gas from the digestive system and improves metabolism.

##### Stick Diagram

0   ← Head lifted  
/ |   |  
/ ( ) ← Knees folded

##### Procedure

- Lie flat on your back.
- Bring both knees towards the chest.
- Hold knees with both hands.
- Lift head and try to touch chin to knees.
- Hold position for few seconds.
- Slowly return to starting position.

##### Contraindications

- Pregnant women
- Hernia patients
- Severe back pain
- Recent abdominal surgery

## 2. Paschimottanasana (Seated Forward Bend)

### Definition / Meaning

"Paschim" means west (back side of body). This asana stretches the entire back portion of the body.

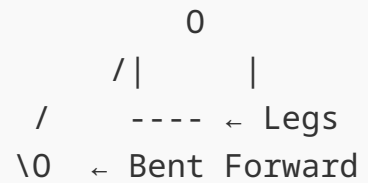

### Procedure

- Sit with legs stretched forward.
- Raise both hands upward.
- Bend forward slowly.
- Hold toes or ankles.
- Touch forehead to knees.
- Hold for few seconds and relax.

### Contraindications

- Slip disc
- Severe asthma
- Back injury
- Pregnancy

### Stick Diagram

A stick diagram illustrating the Paschimottanasana pose. It shows a vertical line for the torso, with a horizontal line at the top representing the head. Two diagonal lines extend from the top of the torso, representing the arms reaching upwards. A horizontal dashed line below the torso represents the legs stretched forward. An arrow points from the text 'Legs' to this dashed line. Another arrow points from the text 'Bent Forward' to the angle between the torso and the legs, indicating the direction of the bend.

### 3. Ardh Matsyendrasana (Half Spinal Twist)

#### Definition / Meaning

Named after sage Matsyendra. It improves spinal flexibility and digestion by twisting the spine and internal organs.

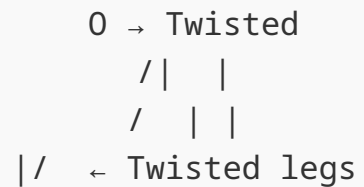

#### Procedure

- Sit with legs stretched.
- Bend right leg and place foot outside left knee.
- Twist body towards right side.
- Place left elbow on right knee.
- Hold posture and breathe normally.
- Repeat with other side.

#### Contraindications

- Slip disc
- Hernia
- Pregnancy
- Spinal injury

#### Stick Diagram

A stick diagram illustrating the Ardh Matsyendrasana pose. It shows a person sitting with legs stretched out. The right leg is bent, with the foot placed outside the left knee. The body is twisted towards the right side. The left elbow is placed on the right knee. The diagram is enclosed in a dashed box.

## 4. Dhanurasana (Bow Pose)

### Definition / Meaning

"Dhanur" means bow. Body forms a bow shape in this posture, helping with core strength and metabolism.

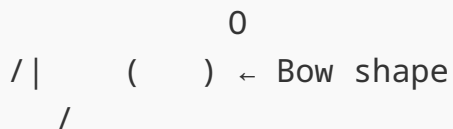

### Procedure

- Lie on stomach.
- Bend knees and hold ankles.
- Lift chest and thighs upward.
- Balance body on abdomen.
- Hold position for few seconds.
- Slowly release.

### Contraindications

- High blood pressure
- Hernia
- Pregnancy
- Recent abdominal surgery

## 5. Tadasana (Mountain Pose)

### Definition / Meaning

"Tada" means mountain. Helps improve posture, balance, and focus while stretching the whole body.

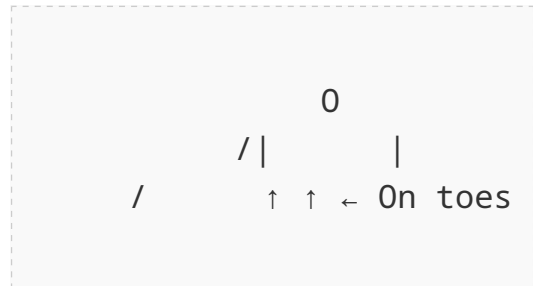

### Procedure

- Stand straight with feet together.
- Raise arms overhead.
- Interlock fingers and stretch upward.
- Rise on toes.
- Hold posture and breathe normally.

### Contraindications

- Severe vertigo
- Low blood pressure
- Knee injury

### Stick Diagram

## 6. Vakrasana (Spinal Twist Pose)

### Definition / Meaning

"Vakra" means twisted. It is a simplified version of spinal twisting to improve flexibility.

### Procedure

- Sit with legs stretched.
- Bend one knee and place foot near opposite knee.
- Twist upper body towards bent knee.
- Place opposite hand on knee.
- Hold position and repeat other side.

### Contraindications

- Severe spinal injury
- Slip disc
- Pregnancy

## 7. Bhujangasana (Cobra Pose)

### Definition / Meaning

"Bhujanga" means snake. Body resembles the raised hood of a cobra. Great for back pain and respiratory capacity.

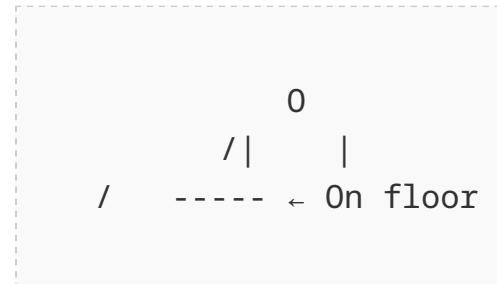

### Procedure

- Lie on stomach.
- Place palms under shoulders.
- Slowly raise chest upward.
- Keep lower body on floor.
- Hold posture and breathe normally.

### Contraindications

- Pregnancy
- Hernia
- Severe back injury

### Stick Diagram

## 8. Gomukhasana (Cow Face Pose)

### Definition / Meaning

"Gomukh" means cow face. Improves joint flexibility and posture, especially in shoulders and hips.

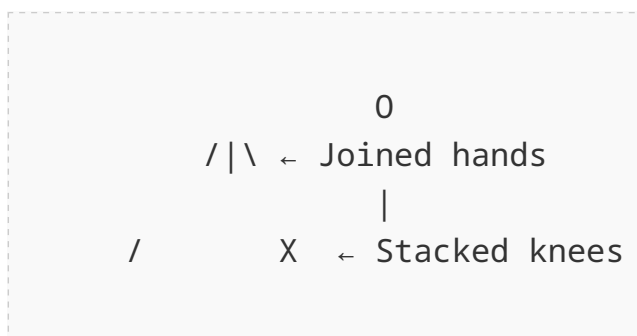

### Procedure

- Sit with knees stacked over each other.
- Raise one arm upward and bend behind back.
- Bring other arm from below and join hands.
- Hold posture and breathe normally.
- Repeat with opposite arms.

### Contraindications

- Shoulder injury
- Knee pain
- Slip disc

### Stick Diagram

### ! COMMON CONTRAINDICATIONS (IMPORTANT FOR EXAMS)

Students must remember that physical activity should be avoided or modified in the following universal conditions:

- **Pregnancy** (Avoid strenuous or abdominal-pressure asanas)
- **High Blood Pressure** (Consult before forward/backward bends)
- **Slip Disc & Spinal Injuries** (Avoid heavy twisting/bending)
- **Hernia & Recent Abdominal Surgery**

- **Severe Joint Pain**
