

STRENGTH, SPEED & ENDURANCE

The Ultimate Clarification: Chapter 7 vs. Chapter 10

The Golden Rule

Focus	Chapter 7	Chapter 10
Core Area	Physiology (Body Science)	Training (Improvement)
Simple Meaning	How does the body work?	How to improve the body?

1. STRENGTH

Chapter 7: Physiological Factors

Determines why some are naturally stronger:

- **Muscle Size:** Larger size = more force.
- **Body Weight:** Heavier builds can lift more.
- **Muscle Composition:** Ratio of fast-twitch fibers.
- **Nerve Intensity:** Brain's ability to activate muscles.

Question: "Why is one athlete strong?"

Chapter 10: Training Methods

Methods to develop power:

- **Types:** Max strength, Explosive, Endurance.
- **Methods:**
 - Isometric (Static)
 - Isotonic (Movement)
 - Isokinetic (Equipment)

Question: "How to increase strength?"

2. SPEED

Chapter 7: Physiological Factors

Determines quickness of movement:

- **Nervous Mobility:** Speed of signal transfer.
- **Muscle Type:** Presence of fast-twitch fibers.
- **Explosive Strength:** Power output.
- **Flexibility:** Ease of joint movement.

Memory: Ch-7 is speed depends on internal body.

Chapter 10: Training Methods

Developing the ability to perform fast:

- **Acceleration Runs:** Going from 0 to max speed.
- **Pace Runs:** Maintaining speed for distance.

Memory: Ch-10 develops speed by practice.

3. ENDURANCE

Chapter 7: Physiological Factors

Determines why you don't get tired easily:

- **Aerobic Capacity:** Oxygen supply to lungs/heart.
- **Lactic Acid Tolerance:** Fighting muscle "burn."
- **Economy:** Using less energy for movements.
- **Muscle Type:** Slow-twitch fibers.

Chapter 10: Training Methods

Increasing stamina levels:

- **Continuous Training:** Long distance without rest.
- **Interval Training:** Fast running with short breaks.
- **Fartlek Training:** Speed play based on terrain.

Exam Magic (Analogy)

Component	 Doctor (Chapter 7)	 Coach (Chapter 10)
Strength	Why are you strong?	How to train/lift?
Speed	Why are you fast?	How to run faster?
Endurance	Why have you stamina?	How to build stamina?
