

COMPREHENSIVE PHYSICAL EDUCATION MOCK TEST

CBSE Class 12 | Academic Session 2026-27

MAX MARKS: 70

TIME: 2 HOURS

SET: A (HARD)

Focus: Application-Based, Analytical, and Conceptual Depth

SECTION A: VERY SHORT ANSWER QUESTIONS (1 MARK)

1. What is the role of the Technical Official in ensuring fair play during a tournament? (1)
2. Name one physiological barrier women face in endurance sports and suggest a mitigation strategy. (1)
3. Define "pranayama" and its preventive role in hypertension. (1)
4. What does "adaptive sports" mean for children with locomotor disabilities? (1)
5. List one ergogenic aid and its potential risk in sports. (1)
6. What is the significance of validity in a fitness test like the Cooper's 12-minute run? (1)
7. Explain the anaerobic energy system's role in a 100m sprint. (1)
8. How does Newton's third law apply to a swimmer's propulsion? (1)
9. Define "intrinsic motivation" with a sports example. (1)
10. What is the principle of progression in periodized training? (1)

SECTION B: SHORT ANSWER QUESTIONS (3 MARKS)

11. Discuss the challenges in budgeting for a national-level sports event and one cost-control measure. (3)
12. Explain the psychological benefits of sports for children, with one example of a barrier and solution. (3)
13. Describe how yoga prevents obesity, including one asana and its mechanism. (3)
14. Analyze the role of Paralympic Games in promoting inclusion for CWSN, with two key impacts. (3)
15. How does pre-competition nutrition impact performance? Provide two tips and one nutrient's role. (3)

16. Explain the procedure and limitation of the Harvard Step Test for cardiovascular assessment. (3)
17. Discuss the physiological adaptations in the respiratory system during exercise, with one benefit. (3)
18. Describe projectile motion in javelin throw, including two factors affecting distance. (3)
19. How does anxiety affect sports performance? Suggest one coping strategy. (3)
20. Explain interval training's benefits for cardiovascular fitness, with one sport example. (3)
21. Outline the functions of the Organizing Committee in event planning. (3)
22. Discuss gender equity in sports, citing one Indian initiative. (3)
23. How does meditation aid in preventing lifestyle diseases? Provide scientific basis. (3)
24. Describe challenges in mainstream sports for CWSN and one inclusive strategy. (3)
25. Analyze the role of micronutrients in sports, with examples of iron and calcium. (3)

SECTION C: LONG ANSWER QUESTIONS (5 MARKS)

26. Elaborate on the committees involved in organizing a major event and their interrelations. (5)
27. Analyze barriers to women's sports in India, citing Khelo India as a solution. (5)
28. Explain yoga's holistic approach in preventing diabetes and hypertension. (5)
29. Discuss types of disabilities in CWSN and adaptive physical education strategies. (5)
30. Elaborate on macronutrients' roles, sources, and intake for elite athletes. (5)
31. Analyze the use of anthropometric measurements in sports, including ethical issues. (5)
32. Explain acute vs. chronic injuries, prevention, and the 3 stages of rehabilitation. (5)
33. Discuss all three classes of levers in the human body with sports examples. (5)
34. Analyze Maslow and Achievement motivation theories in athlete coaching. (5)
35. Explain periodization phases (Micro/Meso/Macro) to prevent overtraining. (5)
36. Discuss safety and security measures in global events like the Olympics. (5)
37. Evaluate the motor and social developmental benefits of sports for children. (5)
38. Analyze specific yoga practices for obesity and CV health, including risks. (5)
39. Explain psychological and social impacts of inclusive sports for CWSN. (5)

40. Discuss ergogenic aids, ethical doping issues, and athletic benefits/risks.

(5)

ABBREVIATED ANSWER KEY

1. Enforces rules, integrity.	10. Incremental intensity to avoid plateau.
2. Lower muscle mass; resistance training.	11. Unforeseen costs; sponsorship.
3. Breathing control; lowers BP.	12. Builds confidence; barrier: Lack of facility.
4. Modified sport (e.g. Wheelchair BBall).	13. Metabolism boost; Dhanurasana.
5. Caffeine; dehydration risk.	16. Procedure: Step/Recovery pulse; Limit: Gear.
6. Accuracy in intended measure.	19. Coping: Visualization.
7. High-intensity, no oxygen energy.	25. Iron (O2 transport), Calcium (Bones).
8. Push water back = move forward.	32. Acute (Sprain), Chronic (Overuse). Rehab: RICE.
9. Internal joy (e.g. playing for fun).	33. 1st: Balance, 2nd: Force, 3rd: Speed.

This hard paper focuses on high-order thinking (HOTs).
