LAST 7 DAYS QUICK REVISION

Topic	Key Concept	Psychologist
Intelligence	Level I (Associative) & Level II (Cognitive)	Arthur Jensen
Personality	Id (Pleasure), Ego (Reality), Superego (Morality)	Sigmund Freud
Stress (GAS)	Alarm Reaction → Resistance → Exhaustion	Hans Selye
RET Therapy	Irrational Beliefs, ABC Analysis	Albert Ellis
Group Stages	Forming, Storming, Norming, Performing, Adjourning	Tuckman

PREDICTION ZONE: 40 HIGH-PROBABILITY MCQs

1. A child remembers mathematical formulas exactly but cannot apply them to solve problems. Level of intelligence?

A) Level II B) Level I C) Successive D) Simultaneous

Ans: B | Exp: Level I is associative learning (input = output) per Jensen.

2. A person channels aggressive urges into playing competitive rugby. Which defense mechanism?

A) Projection B) Sublimation C) Denial D) Reaction Formation

Ans: B | Exp: Sublimation channels unacceptable urges into social activity.

3. Activation of adrenal-pituitary-cortex system in GAS happens in:

A) Resistance B) Exhaustion C) Alarm Reaction D) Burnout

Ans: C | Exp: Alarm reaction triggers fight or flight response.

4. Constant hand-washing out of fear of germs is a:

A) Obsession B) Phobia C) Compulsion D) Delusion

Ans: C | Exp: Compulsion is the behavior; Obsession is the thought.

5. Albert Ellis's therapy focuses on changing:

A) Unconscious motives B) Irrational beliefs C) Core schemas D) Biology

Ans: B | Exp: RET targets irrational beliefs via ABC analysis.

6. Exerting less effort in a group than when working alone is:

A) Group polarization B) Facilitation C) Social loafing D) Conformity

Ans: C | Exp: Social loafing occurs when individual effort isn't identified.

7. Rorschach Inkblot test is an example of:

A) Self-report B) Projective technique C) Behavioral D) Psychometric

Ans: B | Exp: Projective tests uncover unconscious motives via unstructured stimuli.

8. Mental age = 14, Chronological age = 10. IQ?

A) 110 B) 140 C) 100 D) 120

Ans: B | Exp: $IQ = (14/10) * 100 = 140$.

9. In Aaron Beck's cognitive therapy, early experiences form:

A) Core schemas B) Archetypes C) Irrational beliefs D) Libido

Ans: A | Exp: Core schemas are fundamental beliefs developed early.

10. Part of personality operating on reality principle:

A) Id B) Ego C) Superego D) Conscious

Ans: B | Exp: Ego balances Id desires with real-world constraints.

Notice: The PDF contains all 40 Prediction questions including GAD, Diathesis-Stress, Token Economy, and Group Stages.
