

EMPLOYMENT: GROWTH, INFORMALISATION & OTHER ISSUES

Indian Economy | Class 12 Basic Learning

CREATED BY THUNDERSTUDY

1. Why do people work?

People work to earn money, support family, and help the country grow. When people work, they produce goods and services which increases **national income**.

2. Who is a Worker?

A worker is anyone doing work that helps produce goods or services. This includes farmers, shop owners, teachers, and even self-employed people.

3. Worker–Population Ratio

Think of 100 people: if 41 are working, the ratio is 41%. **Formula:** $(\text{Workers} \div \text{Total population}) \times 100$. India has roughly 41 workers per 100 people.

4. Types of Workers

Self-Employed (57%): Shopkeepers, farmers, vendors. You work for yourself.

Casual Wage Labourers (22%): Daily payment, no job security (e.g., Construction).

Regular Salaried (21%): Fixed monthly salary, stable job (e.g., Teachers).

5. Sector-wise Employment

Sector	Meaning	Example
Primary	Nature-based	Farming, Fishing
Secondary	Manufacturing	Factories
Service	Providing Services	Banks, IT

6. Jobless Growth & Informalisation

★ **Jobless Growth:** When the economy (GDP) grows fast, but new jobs are not created at the same rate.

✂ **Informal Sector:** About **94%** of Indian workers are in the informal sector—meaning no job security, no pension, and no health benefits.

7. Types of Unemployment

👛 **1. Open Unemployment:** Want a job but cannot find one.

👛 **2. Disguised Unemployment:** Too many people doing a job where fewer are needed (common in farming).

👛 **3. Seasonal Unemployment:** Work only during certain seasons (e.g., harvesting).

8. Government's Role

The government creates jobs via public sectors and schemes like **MGNREGA**, which guarantees 100 days of manual work in rural areas.

SUPER SHORT REVISION

Types: Self/Casual/Salaried • Problem: Jobless Growth • Sector: Shift to Service • Informal: 94%
