

RURAL DEVELOPMENT

Indian Economy | Class 12 Basic Learning

CREATED BY THUNDERSTUDY 

Imagine India as a big family . Cities are like elder siblings with jobs, while villages are younger siblings who still need help to grow. Rural Development means helping villages become strong, rich, and happy.

1. What is Rural Development?

Improving village life by giving people Education, Healthcare, Jobs, Roads, and Better farming facilities. **Goals:** Reduce poverty, create jobs, and improve productivity.

2. Why is it Important?

-  More than 2/3 of Indians depend on agriculture.
-  Many rural people still live in poverty.
-  If villages grow → India grows. 

3. Rural Credit (Loans)

Farmers need money for seeds and fertilizers before they earn from crops. **NABARD (1982)** was created to coordinate these loans. **Self-Help Groups (SHGs)** also help poor members save and borrow together.

4. Agricultural Marketing

Includes storage, transport, packaging, and selling. Government helps with: **MSP (Minimum Support Price)** and **Buffer Stocks**. Farmers also sell directly via Apni Mandi or Rythu Bazars.

5. Diversification (Beyond Farming)

Animal Husbandry: Livestock like milk and eggs (Operation Flood).

Fisheries: Income from water bodies.

Horticulture: Growing fruits, vegetables, and flowers.

Non-Farm Jobs: Small industries and tourism.

6. Organic Farming & IT

IT: Helps with weather info and crop prices. **Organic Farming:** Eco-friendly farming without chemicals. Healthy for people and nature!

7. Sustainable Development

Development that helps people today without harming nature for future generations. Environment + Economy must grow together.

30-Second Exam Revision

Credit • Marketing • Diversification • Organic Farming • IT • Sustainable Development
